Professional experiences:

My professional career started in July 1984.

The following overview describes more in detail what activities I did until today.

I structured this overview in 4 categories.

> A. *Consultancy, Team lead & Project management*
> B. *Instructor*
> C. *Analyst-Programmer*
> D. *Nursing*

A. Consultancy, Team lead & Project management:

Current situation

Nowadays I work as free-lance technical consultant for Vanwezel Autoparts (http://www.vanwezel.be/index.html) since February 2020.

Job description: Application Engineer (*Technical Analyst and developer*) on IBM i on the core back-end systems in the logistics and WMS domain.

Activities:

Analysis, programming (Full Free RPG & RPG IV, CLLE), implementation, user education and -support and maintenance of several ERP and WMS projects.

Former consultancy activities:

I'm self-employed since January 2015. Between early 2015 and early 2020 I was subcontracted by Harvey Nash (https://www.harveynash.be) via Talent-IT (http://www.talent-it.be/en) and Elmos NV (http://www.elmos.be).

For both agencies I was subcontracted respectively Colruyt Solucious (https://www.solucious.be) by Harvey Nash and to Belfius insurances by Elmos NV (https://www.belfius.be/retail/nl/producten/verzekeringen/index.aspx).

Before my self-employed activities I was employed by several companies in Belgium.

Since february1998 I basically worked as *consultant, project manager & Team lead* for **Iptor Supply Chain Systems** (former IBS) Belgium.

I started at IBS (formerly Proget nv) in 1998 as technical consultant. The main tasks in this function were analysis and programming tasks related to the financial package AFS400.

Since 2000 I moved to the Technology & Services department (at that time called 1S) and I did many Websphere, integration and Webfacing projects. In 2010 this department was renamed into Iptor.

At that time I also started to work as instructor for IBM (*see further*) via IBS.

Since 2002 I gradually moved from technical into business consultant where most of the time I was involved into the CRM business. Many presales and consultancy assignments were part of my day to day occupations.

Curriculum Vitae

Since 2008 my occupations shifted gradually from business consultant into project management. Every now and then I still took care of trainings for IBM.

Since the departure of the business unit manager of the software department of Iptor Belgium in June 2010, I got the opportunity to take over his tasks.

On February 1, 2012 I was asked officially to take over the responsibility of the department and became responsible for the software delivery of Iptor Benelux. In that role I managed 16 collaborators.

As of February 2013 I became responsible for the IBS WMS team. From than on I had a double role, i.e. team lead and project manager. My team implemented the WMS Dynaman. Our activities were spread from Sweden to South-Africa (EMEA). In my department I managed 7 collaborators.

B. Instructor:

a. Free-lance instructor

Since September 2011 I work as free-lance instructor for Talent-IT (http://www.talent-it.be/en) part of the Harvey-Nash group.

Activities

RPG Junior class: once or twice a year I do the training and coaching for people who want to retrain into software developer on the IBM i platform (formerly AS400).

Other training assignments

Sporadic I do also other company specific trainings. F.e. for Syntra business, Belfius insurances, Rexel, Donckers.

b. Instructor at UCLL and Syntra AB

Ucll

Since September 1995 I work as instructor informatics for UCLL in Leuven (Haasrode). (https://www.ucll.be/)

UCLL is a high school were bachelor and graduate educations are organized. I have been working there since the traineeship I had to get my 'Certificate in pedagogic skills' in 1995.

Activities:

Instructor:
- o OOA *(1st year IA)*
- o OOD *(2nd year IA)*
- o Java *(2nd year IA)*
- o Thesis promotor *(3d year IA)*

Syntra AB

In October 2018 I was hired by Syntra AB (https://www.syntra.be/nl)

Activities

- o *I was hired for a beginner course programming in Python during 1 semester.*
- o *Between September 2019 and June 2021 I instructed a java course in a 2-years developer traineeship.*

These Syntra and UCLL activities are my free-time occupations in the evenings and on Saturday morning.
As of September 2021 I only work for UCLL for personal reasons.

c. IBM i instructor

Since august 2000 I *was regularly hired in* via IBS by **IBM** (International Education Center) *as instructor* which I combined with my job as consultant. I did many education projects at several locations (Flanders, Wallonia, Luxemburg & the Netherlands)**.** (https://www-03.ibm.com/services/learning/)

Activities:

WebSphere:
Administration*(Base & Express),* IBM WebFacing

Programming:
Java, RPG/400, RPG ILE, Free RPG, CLP, learning academy, CGI *(Rothman method),* API's.

Database systems:
DB2 UDB, SQL *(basic & embedded)*, DB implementation *(native)*, DB2 Webquery *(Basis & Advanced)*

Today IBM doesn't organise these trainings anymore but delegates these trainings to subcontractors. I'm hired on a free-lance basis every now and then by two of them.

LearnQuest

In October 2022 I started as instructor for LearnQuest (https://www.learnquest.com/).

For *LearnQuest* I'm sporadically hired for IBM i related courses mainly in the application development domain: Basis operator, Free RPG, SQL, CLP, RDi.

Global Knowledge

Since springtime 2015 I'm also sporadically hired by the company Global knowledge (http://www.globalknowledge.be/*) in both Belgium and the Netherlands.*

For GK I did a few courses on a free-lance basis. i.e. Websphere MQ: *(Technical introduction)* and RPG Advanced courses in the Netherlands.

C. Analyst-programmer

a. Elvia Insurances

From June 1994 to January 1998 I worked as analyst-programmer for Elvia insurances NV in Brussels *(Today this insurance company is part of Belfius Insurances where I worked more recently as sub-contractor via Elmos nv)*. (http://www.belfius-verzekeringen.be)

Activities:

Analysis, programming (RPG III & RPG ILE), implementation, user education and -support and maintenance of several projects.

The most important realization I worked on was a project to facilitate the claims department to handle damage from initiation dossier until closure in all its aspects.

b. Terumo

From October 1990 to May 1994 I worked as analyst-programmer at Terumo Europe medical equipment in Haasrode (Leuven). (http://www.terumo-europe.com/terumo/)

Activities:

Analysis, programming (RPG III, Cobol & Lansa), implementation, user education and -support and maintenance of several projects.

The most important realization I worked on was the implementation of a new customer services software package. i.e. Order entry, delivery of goods, invoicing & payments handling.

D.Nursing

From July 1984 to September 1990 I was a hospital nurse at the UZ **Gasthuisberg** in Leuven. (http://www.uzleuven.be/node/743)

Activities
I worked 5 years on the hemodialysis department followed by 1 year on the kidney transplantation department.

In October 1990 I left the hospital after I graduated in IT and started my career in the IT world.

Free time

- o Education (evening/adult institute at UCLL) (https://www.ucll.be) *(see also professional experiences)*
- o Running (once a week)
- o I like Good food and wine.
- o I like to listen to music and watch movies and series with my wife.
- o On vacation, I read books and magazines.
